

# Popular Culture in Perspective

This certificate course intends to familiarize students with the field of popular culture studies - by reading texts of popular culture (ranging from cinema, television, literature, to social media, memes, and fandom) through a theoretical perspective. By looking at contemporary popular culture through the lens of key theoreticians of culture studies, students will come to a nuanced understanding of the ways we are implicated in the cultures we participate in. The course will include seminars by resource-persons from across universities
